

## FC-BB-2 Ad Hoc Conference Call Minutes 0226

1. Steve Wilson opened the conference call at 10:00 MDT on Monday, February 26, 2001.

### 2. Scheduled New Business:

#### 2.1 Action Item Review

The only agenda item was to discuss the models to be used in FC-BB-2.

#### 2.2 Summary of Meeting:

The meeting started out by trying to open Netmeeting. It appeared that you cannot contact anyone outside of your firewall on the server that we tried. So Netmeeting was scrapped after about 30 minutes.

We then began discussing the difference in the models that Mike O'Donnell sent.

Referring to Mike's model, Bob Snively said that BBW3 is a fully functional switch with an E-Port connection. Meanwhile BBW4 is an encapsulation device with a B port. All BBW devices have an FCIP encapsulator.

BBW1 may be implemented into SW2. If that is done, then you basically get a BBW3 device.

A virtual ISL is formed between SW2 and SW7 via BBW1 and BBW 4.

A virtual ISL is also through BBW2 and SW7. BBW4 is not a full switch, so it is just the middle man for SW7.

Does BBW1 consume a domain ID? It shouldn't.

To go from SW6 to SW3, you have a 3 hop ISL connection.

Both models need to be accommodated.

SW7 will see BBW3, BBW2 and SW2, but not BBW1.

One problem is how to do a time limit between SW2 and SW7.

The time sync between BBW1 and BBW4 is independent between any transport.

Two models will be developed.

BBW1 should support SONET, ATM and FCIP.

Action Item: Mike O'Donnell to add virtual lanes to model and post it to T11.

Action Item: Craig Carlson to request meeting time in Toronto on Tuesday night for an BB2 meeting.

**2.3 Future Meetings:** T11 in Toronto.

### 3. Attendees:

<b>Attendee</b>	<b>Company</b>	<b>e-mail</b>
Craig Carlson	Qlogic	Craig.carlson@qlogic.com
Scott Kipp	McDATA	Skipp@mcddata.com
