DONE
7. Discussions of registration authority, as a resolution to letter ballot comment on the meaning, existence and maintenance of FC-AV Type Index Tables was generous and lively. It was noted that SMPTE had set up a registration authority and it was very painful. John Lohmeyer, Gary Robinson, and Bob Snively each had much to say on the use of index tables and painful experiences with registration. An idea used by T10, Self Registration, that requires a full description of the data to be entered in an index table to be transmitted in unicode as part of the FC-AV protocol was presented. After much discussion the resolution of the letter ballot comment, Smiths #8, was tabled to allow time to absorb and think about self registration.
8. Smiths #4 was discussed and Horst noted editing changes to make to include Object Type 1x or 2x in simple mode objects 2 and 3.
9. Smiths #7 was discussed and Horst noted editing changes to remove tables 5 and 3.
10. Smiths #13 was discussed and Horst noted editing changes to clarify reference to Object Type Defined Word.
11. Boeing #8 was discussed and Horst is to make changes with input from Jack.
12. Smiths #20 was discussed. Jack thought Mike Pugh may have some insight to the assignments made in table 8. Jack also thought that Mike Pugh may offer insights to help resolve the yet unresolved, Smiths #8 #11, and #12 too.
13. Jack Keller noted meeting time was running out and suggested the following schedule to generate a post comment resolution document.
  1. Telcon on Feb 15 with Mike Pugh
  2. Telcon on March 1 to finalize unresolved comments
  3. Document Changes provided to Horst by March 15
  4. Draft changes complete and available for review March 26
  5. Release of FC-AV v1.5
14. Action Items were assigned as follows:
  1. Perform document edits resulting from comment resolution discussions. Horst
  2. Request working group meetings per schedule above. Keller
15. Meeting adjourned.

Respectfully submitted,

John Schroeder, FC-AV Secretary
