

Robert Snively
chair INCITS T11 technical committee
rsnively@Brocade.COM

By this letter, as described in the following paragraph, Hewlett-Packard Company ("HP") grants a license to INCITS and the INCITS Fibre Channel Interfaces ("T11") technical committee to allow posting of an HP document identified as "Virtual Interface Architecture Specification, Draft Revision 1.0, December 4, 1997" ("Virtual Interface Architecture Specification") on the T11 web site and/or the INCITS web site and for other uses within the T11 technical committee.

HP grants, under HP's copyright rights, INCITS and INCITS Fibre Channel technical committee a revocable, non-exclusive, worldwide license to post, as-is and without modification, the Virtual Interface Architecture Specification on the T11 web site at www.T11.org and on the INCITS web site at www.incits.org to be used as a public reference, and to use the Virtual Interface Architecture Specification in whole or in part in T11 standards and technical reports developed by the T11 technical committee. All copyright notices, limited rights legends, restricted rights legends and other proprietary rights notices shall be reproduced. Any such posting or use of the Virtual Interface Architecture Specification shall include the following disclaimer:

"The Virtual Interface Architecture Specification does not represent or constitute a contribution or any participation by HP to or in any INCITS or INCITS Fibre Channel Interfaces technical committee standards specification or technical report. The Virtual Interface Architecture Specification is provided "as-is" and HP makes no warranty as to the accuracy or completeness of the foregoing material. No licenses are granted to any HP patent, trademark, mask work, trade secret or copyright. HP makes no representations, guarantees or warranties with respect to the Virtual Interface Architecture Specification, whether express or implied, including any warranty of merchantability or fitness for a particular purpose or on non-infringement."

Sincerely,

Hewlett-Packard Company
