FCoE Terminology for FC-BB-5

David Peterson
Office of the CTO

August 8, 2007
07-441v1

Requirements

- No new Port Type(s) !
 - Management folk (e.g., SMI-S) do not want another port type
 - They want to identify a port via additional capabilities
- Use terminology that is consistent with other FC-BB-x models

Proposed Terminology

- Model: FC-BB_E
- Entity: FCoE Entity
 - The FCoE Entity is responsible for the encapsulation and de-encapsulation
- Switch: FCoE Switch
 - A device that has one or more FCoE ports, routing, and FC services
 - May have FC ports, IP services, L2 ethernet switching
- E_Port: FCoE E_Port
 - Need to determine whether or not this is a virtual E_Port
- F_Port: FCoE F_Port
- N_Port: FCoE N_Port
- End Device: Node
