

SPMA and FPMA with FLOGI/FDISC

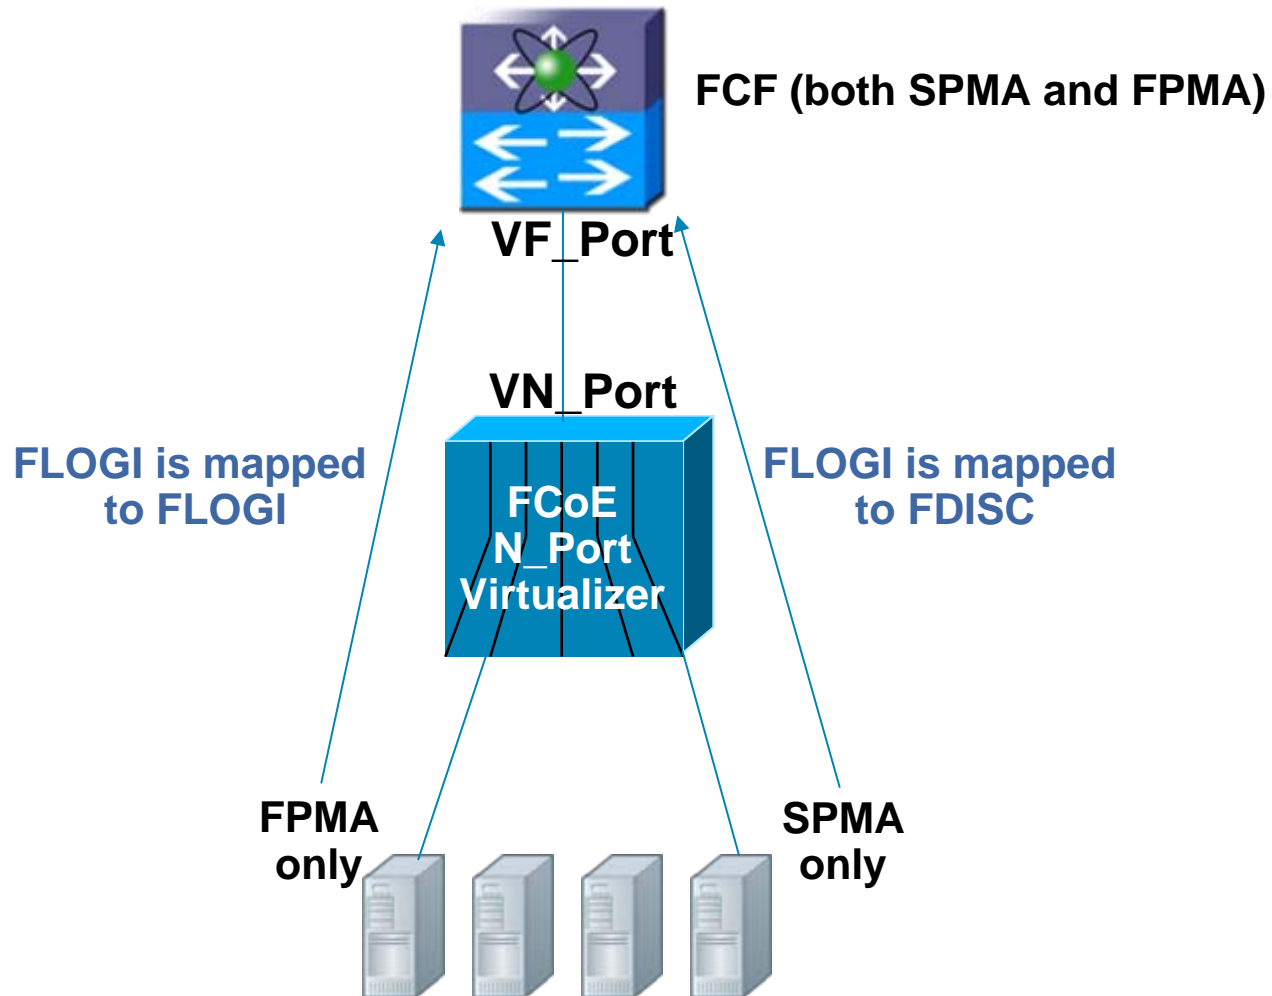

08-470v0

Silvano Gai

The issue

- FCFs can advertise the support of both SPMA and FPMA
- Is there a case where the FLOGI and the associated FDISCs may use a mix of FPMAs and SPMAs?

FCoE N_Port Virtualizer

FCoE N_Port virtualizer

- It may change FIP frames
- It never need to change FCoE frames
- ...
- Therefore there is a case where the FLOGI and the associated FDISCs may use a mix of FPMAs and SPMAs
